Contents

50th Anniversary of the Journal: AI for Science—Functional Materials and Energy

AI-driven interdisciplinary integration from a chemical perspective: opportunities, pathways, and challenges ····CHEN Xin, LIU Yifan, HUANG Jiali, PENG Haonan(1)

ML-driven process optimization and mechanistic insights into controlled and living polymerizations ····LIU Jie, YANG Shugui, CAO Yu(14)

Recent advances in AI-driven cancer nanotherapy····SUN Xiaohuan, LU Yan, WANG Huanhuan(39)

AI-assisted synthesis in reticular framework materials ···· REN Ruiqin, ZHAO Zhihao(49)

Generative AI for inverse design: high-throughput discovery of fluorescent dye molecules···· PENG Lingya, DOU Xiaoya, LIU Lejie, JIANG Yan(61)

Research of Applied Mathematics

VaR calculation method based on normal inverse Gaussian distribution ····LIU Long, REN Fangling(74)

Research of Theoretical Physics

Soliton solutions of two-component Bose-Einstein condensates with Lee-Huang-Yang correction ···· WANG Linhong, LI Rui, SUN Qin, JI Anchun, HU Jie(80)

Spin-orbit coupling effects on electronic transport in group IV graphene like materials ····ZHANG Yanyan, JIANG Wanyi, PEI Wei, ZHENG Jun, YUAN Ruiyang(85)

Analysis of flutter characteristics of supersonic carbon nanotube-reinforced beams ····FENG Ruilong, HAN Mingjun, WANG Weidong(93)

Regional High-quality Development

Research progress and enlightenment of scene theory at home and abroad ····WANG Yan, WEN Jin(105)

Spatial difference and mechanism of registered floating population's migration willingness within the province of southwest China ····YAN Qijiao, ZHAO Meifeng, RAN Saifei(116)

Analysis of characteristics and causes of heavy air pollution in Shijingshan District, Beijing: evidence from three pollution episodes in 2024···· YU Furong, QU Linzhen, YI Huawei, CUI Yangyang, ZHAO Xulong, ZHU Lijun, XUE Yifeng(127)
